Little a che sonk doing about the Shih of tis and Jack has easy times - its me go to the matherand, it sow, perceptibly oredu & our oughts now resemble the ninter nights at Rome Forday April 26th 1046 I Last eve just before the sun vante to his accustomed rest, a beautiful little bird flew upon the deck of the ship - I was in the human of sadnep & could sympathize with the little boardine no doubt list a ke left the spray gover of Japan vsentimed In ofar on the trackles deck - And in a rain of emeblily, add yed to him these lenes. de a Beautiful little bud Which lighted on the deck of the Delinn's some hundred miles & more to the Bastward of the Japan Irlands -I west Bird of the Isle, too far on the lea Thow hast bent thy slight oring-Come hither to me; There is none that will have thee sweet bird of the Isle As thou in this boson, shall rest ifn awhile -The first shade of night is on the dark more, And the 3ephys of eve in their sea-dews lave; And the home many leagues is away in the west How danst not meach it come hitter & rest -

And when the man breaks with its efirst ray be aming, and our the blue sea to thy green iste is streaming. I'll give thee to the wing, if again thou will done to cut they fleet way, through the deep azure air -

But the breast is now beating lone bird of the Fole And none its grief breakings, kath former to be quile; Thou dreamest of the left one mong bowers of the clove, There carolling her resper, this eve in the grove:

"That to night he returns not to his cinnamon bough?

The oft spicy breves lose their sweetness of or me,

While I am absent my lost one, my lost one, of rome thee!"

But chen there little bird of the sweet agme erest,
Again there mayst see, they green isle in the west;
Then hie there to might five many leagues on,
And thou shalt live again + live in they own sping Rome.

Such a glowing day, herelifore I have not been comfulled to hap at sea - Testenday morning of fench bright & alear, but at nom the area a gate of mind where seadings is more the music that goets in wherever of otherscover are \$0. Our Callain acted fintlemanty in the transaction, Sint by security the whale of the statua & second by his general secperintendence of clinichen, the whale man fairly alingrid. Runday August 6th. 1846of the repell who claimed it. Lence the 25th of last month for have laken 2 Right orhale + have epirkent gammed with 3 ship. The weather Ras been of a Rend of aux our by works have been sending fath the dense black smoke of an over the sea. The first of thise whale was struck & Riced by the mate in a rugged sea rather late in the evenings the management of the Lickeyment shown in his killing of in his Saving, proved M. Hallock to be a whaliman of the 1st order- The whale or an efat thingh nort large I made in 145 bands of oil The bone from his head mus lange + good. The last whale was the langust our Captain said that we had as Jet taken . He would have measured over 80 Gest in length of twas indied a mondaful Right, to behold this monster in all his greatnif alongside of our which tom tip to tip of fluker I have no cloud he mutel have measured lover 30 feet. He was indeed a minister for that are increditions, imagine a fish of the dimondions of which I write of the one oras it out a cums shedade. The head was saved & Rosted in on deck + alt on gh I have seen many heads, elite I could but bland stuck onth amagement at viewing this monding ne shrieture - The top of . The head is black skin + is corned mit barnaches + to de end, resent niv a bunch, which is called his binnet. The bine their wins at a emale angli to the base of between the plate, purhabithinis an inch apart. The lingth of the bine same of course onig the size of the whale, but in this one muld measure over 15 feet. The head being of

olight curve the bone of the head at either and is much Imallie & chutic thou at the middle - The Throat fried was near spirity first in length of at its midst Last monted measure efrom 12 to fifteen feet. There is no may by which we could give his actual circumof evence of body In be it understood that this measure und thingh his thicked hart is nearly egnal to his mealine en length. This whale trus remarkably. mide acrost the back & admitting his diameter left he is in the hant I should of as unud as a ball I to be only liventy ofeit, muld kave Brade Ku measure around near his shoulder the quite distance of 60 feet. He a crais in bruth the languet sized whate me Lavi as git seen & get when tried out anaderes but 120 bands of oil. I ovar a cow whale of my doubt had heen suckled long by her early & hence the acruse of his thin Slubber - Hood me been frimilled to take his lend a month later, one lastain dinter but little that " she corned have netted in orean 31 bands - The trungs of the whale is attached to the therat & is its length; it is ofrom 6 to 8 ofest deip + generally makes ofrom offtein to twenty bands of oil - I have this attempted to give some idea of the size of a his west whale. I i say that I have exagerated borned be untime as in order to give as trear as may be his correct Broknling I have amounted both officers & crew + Lave here written, what they gave one. One need not be dufinised at the winder, with which I gazed at this Ringular handwork of the deety - on any infant. days I had frictimed to myself, the raging sea + its min-Alit - I had read & re-read of monthme whalis of June & distructive sharks - on my cheans, I had been at Rea Runnanded by whales & Shanks they ofthe knowny the Ihr I he the dream somed o cream onth Konn at then sight & month tremble once much from

Shas a fact of the history of new zealand.

"Poras a spirit of Speculation." 3 that included a body of min furned under the name of the the New Zealand, Company, to enter upon this place, as the office le of their emagined rich & profetable Rawet - Phy were frim-In cihally Englishmen & among them, were some of the highest name, It that graced the calendar of English mobility - I'm a afew blankity I little Tobacco, much more of their a Mustlet in two, they funchased. from the friendly & unsuspecient natives, many weres of land, took tille of the same & then be gan their ofenaling. They then enliced the different potential genermments, to adopt the h-Land as their own & England Genally though a belief that France mas about to anake settlement here, took it of made it her own. Through the authority of under the Stordetin of the English oflag, many more induced to be one their homes & settle here, in the thew the mildest of landy-By agriculture of the means of improvement settlements grew + Tomushed t the tender theveet examile of the liopies transplanted here & nurlined, reproduced & seemed not unfoundly to the change of soil. New Lealand oras efact loving her eterility of the here of there of Garms, onthe the acuring of many dwellings, told of the rapid march of its civilization. The native too instructed by the example of the white, had also his hatch teening outh the green of the regulable sofuned for him a new hath of life I enculcated in him, the germs of industry tlaber. But like unto the guing days of our how prosperous republic, more land was needed by the Delthu fas he swelled his little own, the native receided I went back again inland, to enjoy his non & to recomme his furner labors - The government to manted more acres of in punchase arme the first question of tille, that had as get been made - Be coming omme & more awake 2
